Neurology within society

First Announcement

www.ean.org #ean2025    

Dear Colleagues, dear Friends,

We are thrilled to invite you to the **11TH ANNUAL CONGRESS OF THE EUROPEAN ACADEMY OF NEUROLOGY**, which will lead us to the vibrant city of Seville on **21 – 24 JUNE 2025**.

Seville is the fourth largest city in Spain and the capital of the region of Andalusia. It is one of those very few cities in the world with which you will fall in love at first sight. Its seductive charm comes from centuries of many different overlapping cultures that have left their mark here.

This long, rich and varied history makes Seville a unique experience for everybody. The city's abundance of touristic opportunities, along with its modern outlook and fantastic infrastructure, make it an exciting destination for any visitor.

The EAN congress will embark on this Andalusian adventure with an innovative and intriguing Overarching Theme that will address 'Neurology within society'. The topic particularly challenges our practice since our society impacts the progress, priorities, and relevance of neurology, and, conversely, neurology influences decisions and developments in society.

This creates a highly complex and consequential set of interactions that affect all of us – professionals and patients alike. As usual, this theme will weave like a common thread throughout all of the invited content of our congress, from workshops to plenary sessions.

On behalf of the EAN Board and the local organising committee: join us in Seville for a fiesta of neurology in June 2025!

Elena Moro
EAN
President-Elect

Ulf Kallweit
Chairperson

Local Organising
Committee

Sunday, 22 June 2025, 10:00 – 12:00 Presidential Symposium

- The Brain Prize Lecture
Haim Sompolinsky
- Moritz Romberg Lecture
Marina de Koning-Tijssen, Groningen, The Netherlands
- Charles-Édouard Brown-Séquard Lecture
Claudio L.A. Bassetti, Bern, Switzerland
- Camillo Golgi Lecture
Maria Grazia Spillantini, Cambridge, United Kingdom

Neurology within society

The Overarching Theme for the EAN Congress 2025 in Seville explores the multifaceted relationship between neurology and society.

Our theme covers a range of important topics such as the distinction between neurodegeneration and normal aging; economic challenges in European neurology; societal perceptions of neurological disorders; regional variations in neurological management exemplified by stroke care; the impact of modern environmental changes on cognitive functions and dementia development; and the integration of neuroscience techniques into social sciences to address contemporary challenges in learning, economics, and societal emergencies.

Combined, these topics comprise an Overarching Theme that offers comprehensive insights into the intricate connections between neurology, society, and environmental factors, spanning from the clinical intricacies of neurological disorders to the broader societal implications and the integration of neuroscience in addressing contemporary challenges.

This Overarching Theme will be the focus of many sessions to suit the interests of all neurologists, whether clinicians or scientists, general or specialised neurologists, from the younger to the more advanced generations.

Overarching Theme

Saturday, 21 June 2025, 08:00–09:30
Focused Workshop:

6 million years of evolution: Do we fit in today's society?

- Influence of sleep and chronotypes: Are we adapted for today's society?
- The social media/smartphone world: Effect on attention and memory
- Impact of lifestyle, nutrition, and pollution on the development of neurological disorders

Sunday, 22 June 2025, 08:00–09:30
Focused Workshop:

Interactions between brain and environment

- Neuropaedagogics – linking brain function, teaching, and behaviour
- The evolving social brain: Understanding how brain function influences relationships
- How do people with neurological disorders cope with global emergencies

Monday, 23 June 2025, 10:00–12:00
Plenary Symposium:

Neurology and society – how do they interact?

- The difference between neurodegeneration and normal aging – an anthropological view
- The economic costs of neurological disorders
- Stigma and perception of neurological disorders in Europe
- Different approaches to neurological management in Europe
